EDUCATION

Universidad Autónoma de Occidente

📅 Agosto 2020

Relevant courses

- Data structures and algorithms
- Object Oriented Programing
- Databases
- Discrete Math
- Introduction to data science
- Software Engineering

SKILLS

- **Front:** Html, Css, ReactJs, NextJs, TailwindCss.
- **Back:** NodeJs, Express, SQL, PL/SQL.
- **Databases:** MongoDB, Oracle,MySQL, SQL server.
- **Programming languages:** Python, JavaScript, Java, C#.

LANGUAJES

- Spanish (native)
- English C1

ABOUT

I am a student passionate about technology and programming, currently in my sixth semester of computer engineering with the goal of becoming a top-level developer. I am seeking an opportunity to take my first steps in the work world. I have studied various technologies both at university and independently. My desire is to apply the knowledge and skills I have acquired so far in a remote work position with the goal of continuing to learn in a different way and gaining formal experience in the field. I am excited about the opportunity to combine my skills and dedication to help companies achieve their technological goals.

EXPIRIENCE

Front Web Developer

Freelance

📍 Remote

- Developed and designed personal websites for university classmates, acquaintances, and family members using basic web development technologies.
- I have used some web application hosting services for apps developed with JavaScript, including gh-pages, Vercel, Heroku, and Adaptable.

PROJECTS

University Apps

Scan-Web (MERN Stack App)

📅 August 2022 – November 2022

- Design of the client and server for a web application to help a small company with the task of registering imports.
- Client: React y TailwindCss
- Server: JavaScript, Node, Express, y MongoDB

Independent Study

Booking App (MERN Stack)

- A property search web application that uses the MERN stack. In this project, I was able to improve the routing, file structure, and APIs within the server.

Web Portfolio

- Full development and design of my own personal portfolio website, which includes detailed information on some of my most relevant projects, including their code and in some cases, a functional demo.
